GEMMACON

Customers reference

The optimization or transformation of processes and procedures within a company using the example of a truck manufacturer.

Situation

- Some processes are not available or have to be revised
- System change is imminent (Xeri -> PROMIS +)
- New development of the series development and homologation process (subproject)

Our solution

- Preparation, participation and follow-up of the system change
- Recording and modeling of missing processes
- Coordination and cooperation with the departments of truck development
- Contact person for all process and system questions
- Support during (internal) auditing (DIN EN ISO 9001: 2015, IATF 16949: 2016)

Results

- Processes are updated, new processes are created and coordinated
- System change is completed
- Serial development process available
- Homologation process available and CCC certified
